

SPLITTER KITS FOR LOOSE TUBE, MICRO DISTRIBUTION AND RIBBON FIBER CABLES

Opticonx SPK Series Splitter Kits are designed to quickly and easily breakout loose tube stranded & micro distribution, loose tube unitube/central tube and ribbon cables containing 250µm fiber for direct termination with industry standard connectors. Three different splitter kits are available.

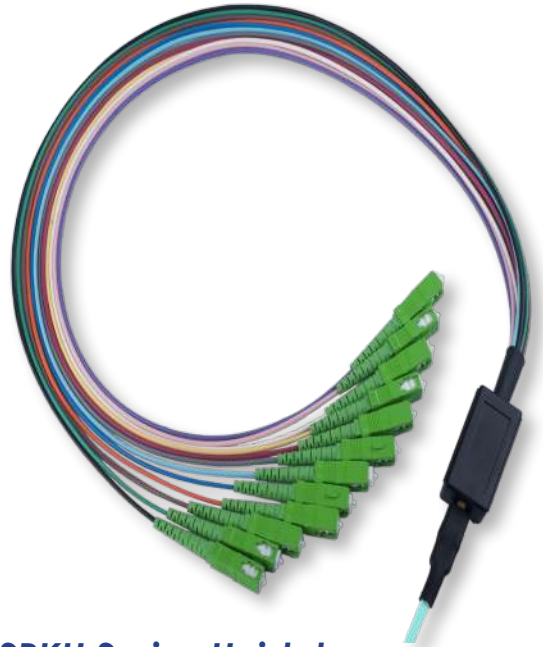

Applications

Field termination of multi fiber per tube, loose tube stranded & micro distribution cables, loose tube unitube/central tube plus ribbon fiber cables

Features/Benefits

- No special tools required
- Color coded tubing
- Fits virtually any cable design
- Installs in minutes
- Works with all 900µm booted connectors

Simple and easy to use, SPK Series Splitter Kits route individual 250µm fibers into individual 900µm, Hytrel, color coded buffer tubes via a compact protective housing. The fiber can then be directly terminated, using industry standard connectors with 900µm boot. The kits are designed to work with any manufacturer's cable.
